ABOUT THE CALL

Through the EU PRO development Programme, the European Union (EU) allocated 4.5 million Euros in support of entrepreneurs, micro and small enterprises, with the aim of enhancing competitiveness of local economy.

Between 22 May and 6 July, EU PRO conducted a Call for Proposals for Procurement of Equipment and Provision of Services for Entrepreneurs, Micro and Small Enterprises engaged in production and IT services and registered in 99 cities and municipalities participating in the Programme.

The selection of beneficiaries was conducted in two phases. The first phase involved the Evaluation and ranking of submitted concept notes which were assessed on the basis of relevance and viability, capacities for the implementation, design and feasibility of the business idea. The second phase, the Evaluation of full proposals for projects, reviewed the projects that were positively assessed in the first phase on the basis of expected results and effects, sustainability, social impact and cost.

This document offers an overview of the process and provides a list of the projects recommended for funding.
